

HEALTH, SAFETY & ENVIRONMENTAL VALUES

As a proud member of the American Chemistry Council, we are committed to managing our operations in a safe, secure and sustainable manner in accordance with the Responsible Care® Guiding Principles. The following values guide our everyday actions.

At AdvanSix, we are committed to:

Safety as a core value

We accept responsibility for our own personal safety and for the safety of colleagues and the communities in which we operate.

Compliance

We will meet or exceed all applicable Health, Safety and Environment (HSE) regulations, company standards and voluntary initiatives to which we subscribe.

Protection of our environment

We are committed to operating responsibly and we seek to minimize adverse environmental impacts from our operations, products and services.

Engaging stakeholders and maintaining a dialogue

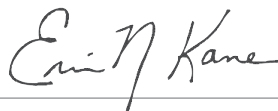

We understand, address and communicate the health, safety, environmental and security impacts of our operations, raw materials and products throughout their lifecycle. To convey our commitment, we engage in an open and honest dialogue with employees, business partners, public authorities and our communities to discuss their concerns, present our actions and communicate results.

Continuously improving the performance of our products and processes

We integrate HSE into our overall business strategy by using our management system to set improvement goals, measure our ongoing performance and drive continuous improvement action plans.

Implementing processes to assure adherence

We provide our employees with the education, skills and training to enable our commitment. We verify adherence through internal and external audits and we require employees to report and learn from any inconsistent behaviors.
